

CLIMATE WARS

Copenhagen: A NEW HOPE?

Twelve months to hit our target. Will we make Planet Earth a Death Star or a Green World? There's a long way to go, and we all must come together for:

- **A Global Goal** – informed by the latest science, bold enough to prevent catastrophe.
- **Fair Shares** – everyone must do their part, those who've polluted most must change most.
- **Funding and Technology** – huge new flows are needed to help the vulnerable and meet our global goal.
- **The Force to Deliver** – practical plans, inventive ideas, binding targets and enforcement.

The Kyoto Alliance can lead the way – developed countries making absolute commitments to turn their societies green by 2020, giving massive support to the rest of the world to catch up.

But the G77, China, and the whole world must lead too – building the momentum for real climate justice for all, and acknowledging everyone's responsibility to change.

MAY THE FORCE BE WITH US ALL.
