

THE WORLD NEEDS A CLIMATE HERO

The battle against climate change is a fight for human survival. This weekend's G7 meeting will see an epic struggle to get a commitment to end the age of carbon that threatens everything. One woman in the room can use her power to save us.

Angela Merkel: more than **2.7 million** people are calling on you to stand up to climate villains Canada and Japan, quit coal, and suit up for 100% clean energy.

We've got your back.

**Be the hero
the world needs.**
